Maintenance for your landscape beds after mulching: To help keep your landscaping looking good, here are some helpful products you can find at your local garden center for a 2-step weed control program .

Preen Weed Preventer stops weeds from germinating in flower and vegetable gardens, in ground covers and around trees and shrubs. Although Preen will not [kill existing weeds](#), it can be used as a grass weed killing alternative. It will prevent new weeds from sprouting – eliminating the need for difficult and time-consuming hand-weeding. Without weeds, your valuable plants can grow larger and stronger. It can help keep your beds neat and weed-free all season long!

Apply Preen Garden Weed Preventer during the growing season around established plants and transplants. Preen should not be used on flower seeds. It can be used after flowering plants have germinated and are 2-3 inches tall. Preen may also be incorporated into the soil when seeding vegetables or applied after mulching beds. By applying Preen as early as possible, you can eliminate the need for hand-weeding. Rain does not wash this product out of the soil. To keep beds weed-free all season long, reapply Preen weed preventer every 9 – 12 weeks. We also recommend sweeping this product into cracks along your walkway, driveway or patios.

Applying with Mulch

For best weed control, we recommend applying Preen Garden Weed Preventer after spreading mulch on your flower and shrub beds. Sprinkle Preen on top of the mulch being sure to keep granules away from plant foliage. Immediately water this product into the mulch. If watering-in is not convenient, lightly rake into top layer of mulch. Always wash or brush off stray granules from plant foliage to avoid damage or discoloration.

ROUNDUP WEED KILLER

When to Apply: Apply when weeds are actively growing. Be sure to spray when the air is calm to prevent drift to desirable plants.

May be used around vegetable gardens. Also use on patios, walkways, driveways, gravel and mulch beds, around shrubs or trees, in flower beds, and along fences.

What it Controls: Weeds: Kills all vegetation contacted. Avoid spraying on the leaves of your shrubs and trees. We recommend using on less windy days.

Benefits: Pump 'N Go provides up to 5 minutes of continuous spray. Extendable wand provides greater accuracy without bending over. Ideal for consumers who demand convenience and ease of application. Pre-mixed, pre-measured, easy-to-use.

For those of you that would like someone to take care of this for you, Our Friends over at the Green Scene can also provide lawn care and ornamental tree / shrub care services for your Picture Perfect landscape. They specialize in lawn care fertilization including weed, disease, and insect control of both lawns and planting beds., winterization of trees/shrubs, and also seasonal flea and tick control for those that live by the woods.
